

Grand Ballroom

Grand Hyatt Hong Kong

Showcase

Hotel

The brand-new ballroom has a new stage lighting design, with energy efficient LED lighting fixtures.

MacoLEDs LED Profile spotlights can be stored inside an automated ceiling cover system.

All Lighting bars are motorized and can be managed backstage by a touch-screen Hoist Controller.

Ballroom makeover with state-of-the-art LED Stage Lighting

Grand Hyatt Hong Kong is located adjacent to the Hong Kong Convention & Exhibition Centre, with commanding views of Victoria Harbour. The hotel's 680m² Grand Ballroom has a pillar-free design and a permanent stage, and is one of the largest in Hong Kong, ideal for meetings, incentive events, conferences and private parties up to 1200 persons.

After a 5-month renovation project, the brand-new Grand Ballroom reopened in September 2013. The carpeted foyer, sliding doors between the ballroom and the foyer, and the more-elaborate-than-before chandelier have made this legendary event venue even more grand and elegant.

Being the first hotel in Hong Kong to introduce a built-in HD LED TV wall, the Grand Ballroom offers guests excellent visual experiences with a state-of-the-art technology infrastructure. This time, Grand Hyatt aimed for an energy-efficient solution for their stage lighting area, and took one step forward to replace their existing tungsten fixtures with LEDs. Macostar's MacoLEDs R Series LED spotlights were chosen, as they save up to 77% of electricity generated by conventional 1,000-watt tungsten fixtures.

Scope of work

Macostar was responsible for the design, supply and installation of Stage Lighting, Motorised Lighting Bar with Synchronised Automatic Ceiling Cover systems at the Grand Ballroom of Grand Hyatt Hong Kong.
