## DPR Dimmer Racks

SZTV of Shenzhen Media Group

### Smart Dimming for TV Studios

The new headquarters of CCTV China, SZTV as well as Hong Kong's TVB and ATV have been recently installed with DPR Intelligent Dimmer Racks as the dimming solution for studio lightings. A single full rack offers up to 120 dimming channels, with each dimming channel transformable to a non-dim channel. The

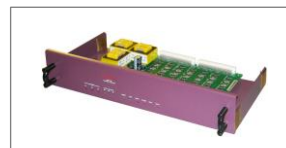

smart ventilation system detects temperature inside the rack and automatically adjusts airflow. Lighting technicians can easily monitor the real-time operation status with a simple touchscreen or via a remote PC.

DPR Dimmers are equipped for the 1900 m<sup>2</sup> Studio 8, ATV's largest production studio.
